URBAN FORESTRY WORKSHOP

DEVELOPING YOUR PARTNERSHIP REFLEX IN URBAN FORESTRY

APRIL 15, 2027

Join urban forestry practitioners, community partners, municipal leaders, universities, consultants, and students for a day focused on building your partnership reflex: knowing when to reach beyond your organization, who to bring to the table, and how to turn relationships into action.

Through practical case studies and facilitated conversations, guided by the SFI Urban and Community Forest Sustainability Standard, this year's SFI Urban Forestry Workshop will explore how strong relationships and shared resources help communities take meaningful action to grow urban forests. Hear directly from universities, municipalities, and consultants applying the SFI Standard to set and track their goals.

Connect with peers and supporting organizations, discover practical resources, and leave with new ideas, stronger relationships, and a broader network to help grow forestry impact where people live.
