

FORESTS

ARE THE ANSWER

2018 SFI PROGRESS REPORT
18-Month Calendar
July 2018–December 2019

SFI-00001

WHO WE ARE

SFI IS A SUSTAINABILITY LEADER THAT STANDS FOR FUTURE FORESTS

The Sustainable Forestry Initiative® Inc. is a sustainability leader that stands for future forests. SFI® is an independent, non-profit organization that provides supply chain assurances, delivers conservation leadership and supports education and community engagement. SFI believes that forests are the answer to so many of our conservation, community and supply chain challenges.

SFI works with the forest sector, brand owners, conservation groups, resource professionals, landowners, educators, local communities, Indigenous Peoples, governments and universities. SFI standards and on-product labels help consumers make responsible purchasing decisions.

More than 300 million acres/120 million hectares of forestland across the U.S. and Canada are certified to the SFI Forest Management Standard and millions more are positively impacted by the SFI Fiber Sourcing Standard.

Additionally, SFI oversees the SFI Forest Partners® Program, which aims to increase the supply of certified forest products, the SFI Conservation and Community Partnerships Grant Program, which funds research and community building, and Project Learning Tree®, which educates teachers and youth about forests and the environment.

SFI Inc. is governed by an independent three-chamber board of directors representing environmental, social and economic sectors equally. The Board sets SFI's strategic direction and is responsible for overseeing and improving the internationally recognized SFI Program and SFI standards.

Message from the PRESIDENT AND CEO

At the Sustainable Forestry Initiative, we believe forests are the answer to many of our local, national and global challenges.

PROVIDING SUPPLY CHAIN ASSURANCES

We believe well-managed and certified forests and forest products that are responsibly sourced are the answer to societal needs that are focused on clean water, clean air, wildlife, recreational opportunities, green jobs and quality products from a renewable resource. We are thrilled that SFI certification continues to grow and that 41% of consumers recognize the SFI logo, and over 20% of Fortune 100 companies use the SFI on-product label. We know that by connecting landowners to brand owners, and in turn to the consumers that buy their products, we can help grow an appreciation for certified products. We aren't alone in this belief.

DELIVERING CONSERVATION LEADERSHIP

Our conservation efforts begin with our SFI Program Participants' 2017 investment of almost \$60 million in research — a mandatory requirement of our standard. Seventy-five percent of those research dollars are linked to conservation-related objectives. This institutional commitment to research sets the stage for over 400 different conservation and research projects, with over 550 unique partner organizations including government, community, conservation, academic and other partners in the SFI community. SFI has awarded over 100 Conservation and Community Partnership Grants since 2010, totaling over \$14 million in leveraged funds, and we are now directing our grants program to quantify the conservation impact of SFI's forest management and fiber sourcing footprint so we can understand how much carbon is stored, how much water is purified and how much biodiversity is maintained or recovered across the SFI network. With over 120 million hectares/300 million acres third-party certified to the SFI Forest Management Standard, and millions more positively influenced through third-party certifications to the SFI Fiber Sourcing Standard, we know that when the SFI community engages in conservation leadership, it has the scale to make a difference. And we are making a positive one.

SUPPORTING EDUCATION AND COMMUNITY ENGAGEMENT

At the heart of the SFI network are 34 state, regional and provincial SFI Implementation Committees. For over 20 years, they have provided logger training in key areas like preserving water quality and landowner outreach. In addition, they have supported a variety of community initiatives, including Habitat for Humanity, conservation trails, and jamborees with outdoor recreation groups, among others.

SFI's contribution to addressing these challenges is seen every day in the work we do and the partnerships we build to provide supply chain assurances, elevate the conservation contribution of well managed forests, and promote environmental awareness through education and community engagement that improves our shared quality of life. As the pace of urbanization accelerates rapidly around the world, it's critical that we remain connected to forests and continue to recognize the important values forests support.

We are pleased that there are many large brand owners and social purpose organizations that care about responsible supply chains and are committed to walking the talk when it comes to promoting certification in the supply chain. For example, the SFI Forest Partners® Program, which is composed of National Geographic, Meredith, Macmillan Publishers, Pearson, Hearst Enterprises and Boy Scouts of America, is investing in the future of our forests by making multi-year commitments to increase certification throughout the forest supply chain. The program recently saw the launch of two innovative solutions — the SFI Small Lands Group Certification Module and the SFI Small Scale Forest Management Module for Indigenous Peoples, Families and Communities. These modules will encourage certification in areas where we believe we can have even greater success.

SFI is also working hard to grow our relationships with Indigenous communities through the provision of grants that focus on addressing the decline in steelhead trout and passing traditional knowledge from elders to youth – and to our own network, so we can respect these values in our operations. We have earned the respect of the 40 Indigenous communities across North America that have chosen the SFI standard for application on the 4 million hectares/10 million acres that they manage or own. We also want to connect our networks with African-American landowners to help them retain their forestland as forests and provide pathways to income streams from those forests, which not only improve quality of life but also open up a world of green forest sector jobs to these communities.

In 2017, the SFI network expanded its reach significantly in the environmental education space when Project Learning Tree (PLT) became an SFI initiative. PLT is an award-winning environmental education initiative that helps educators integrate environmental education into lesson plans and use the outdoors to engage students in learning about the world around them. We are excited by the opportunities and synergies presented to us by bringing the PLT network, with its many environmental, association and government sponsors, together with the SFI network. PLT uses the forests as windows into environmental education. And what a window it is — full of the answers to our local and global challenges. PLT doesn't teach kids what to think, it teaches them how to think, and in making them more connected to our forests and the natural environment we are convinced we are doing our part to inspire the next generation of future forest and conservation leaders.

Kathy Abusow

PRESIDENT AND CEO

STATS AND FACTS

These stats and facts show progress supporting SFI’s three pillars: supply chain assurance, conservation leadership, and education and community engagement.

Fiber Sourcing

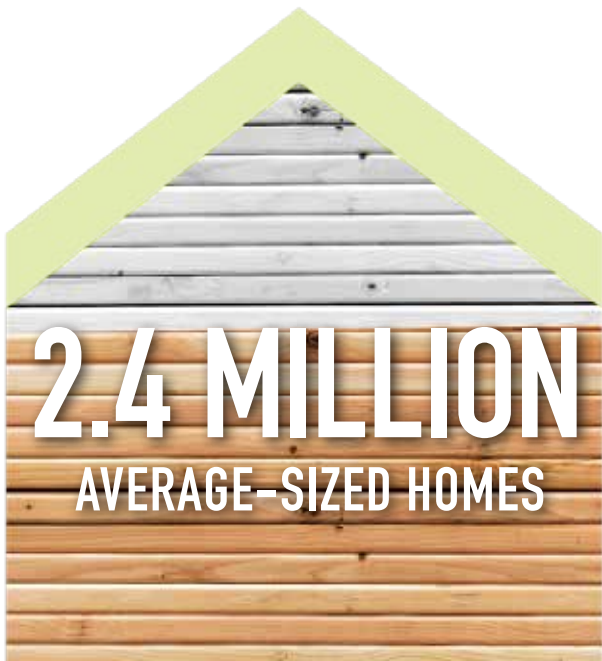

THE SFI FIBER SOURCING STANDARD

The SFI Fiber Sourcing Standard is designed for manufacturers that don’t own forestland, but source directly from the forest. Because 89% of the world’s forests are uncertified, the 2015-2019 SFI Fiber Sourcing Standard provides a way to govern how SFI Program Participants procure fiber from non-certified forestland. This standard is unique to SFI and encourages the spread of responsible forestry practices such as conserving water quality, providing outreach to landowners and using the services of trained forest management and harvesting professionals.

THROUGH THE
GREEN JOBS
IN GREEN
SPACES
PROGRAM

Where will they
GROW?

Green jobs will grow their careers in the great outdoors.

Project Learning Tree (PLT) Canada, an initiative of SFI, has a mission to grow future forest and conservation leaders. PLT Canada aims to fill over 1,000 jobs through the SFI network and 600 jobs through the Canadian Parks Council Canada to get Canada’s youth working in the great outdoors. These jobs are funded in part by the Government of Canada’s Summer Work Experience Program.

“Providing summer work experience in Canada’s provincial and territorial parks is an opportunity to inspire a lifelong commitment to professions that serve and enhance the powerful benefits of nature and forests.”

IMPROVE OUR SHARED
QUALITY OF
LIFE

How will we improve
our shared quality of
LIFE?

Forests certified to SFI are a big part of the answer.

Forests play a critical role in achieving global sustainable development goals relating to water, biodiversity, climate change and carbon sequestration. The SFI Annual Conference theme – *Forests are the Answer* – highlights how well-managed forests are key to our shared quality of life today and in the future.

SFI accounts for

EMERGING MARKETS

FOR WOOD PRODUCTS
NEED RESPONSIBLE
FORESTRY, TOO

Will new markets
emerge for
**WOOD
PRODUCTS?**

Yes, because responsible forestry helps make wood an excellent environmental choice.

Wood is an excellent sustainable choice and new wood products are growing in popularity. But many of wood's positive attributes depend on how the forest is managed. Third-party forest certification standards like SFI demonstrate that the forest is managed for multiple environmental, social and economic values. So, whether it's fluff pulp for textiles, wood pellets for energy or mass timber for tall wood buildings, well-managed forests are helping drive the green economy.

PRESERVING FAMILY LEGACIES

WITH MANAGED FORESTRY

What will our LEGACY BE?

Preserving the heritage of minority and marginalized family land ownership through forestry.

SFI is committed to engaging diverse and non-traditional forest owners in the U.S. South. Through partnerships with groups including the Georgia Heirs Property Law Center and the Black Family Land Trust, SFI is helping to address critical heirs' property and land retention issues so that families can continue to maintain and get value from long held family forests.

“We are collaborating with SFI to help keep forests as forests. Managed forestry is a powerful tool to create an income stream that can help preserve the heritage of family forests.”

— Skipper G. Stipe

WELL-MANAGED FORESTS PROVIDE HEALTHY HABITAT FOR MULTIPLE SPECIES

How do we help species thrive in WELL-MANAGED FORESTS?

By turning conservation research into forest management practices.

SFI's conservation grants are focused on advancing our shared understanding of the conservation benefits associated with well-managed forests across the United States and Canada. SFI takes an active role in working with grantees to help clarify the connection between sustainable forest management, responsible supply chain choices, and the environmental benefits we all care about.

Since 2010, SFI

THE SFI FOREST PARTNERS PROGRAM

GROWS
CERTIFICATION

IN NEW AND
INNOVATIVE
WAYS

How do we strengthen
the link between
LANDOWNERS, BRAND
OWNERS AND MARKETS?

The SFI Forest Partners Program leads the way.

The SFI Forest Partners® Program strengthens the links between landowners, manufacturers, customers, conservation groups and government agencies. Companies increasingly want assurance that their products are from responsibly managed forests so by developing coordinated projects with market leaders and stakeholder groups, SFI is increasing the source of forest products and mills that are certified to SFI.

“We are pleased to participate in SFI’s Forest Partners Program. As publishers, we have a role to play in strengthening forest management practices and procurement through certification.”
— Marcela Martin
CHIEF FINANCIAL OFFICER AND EXECUTIVE VICE PRESIDENT, NATIONAL GEOGRAPHIC PARTNERS

WELL-MANAGED

FORESTS

SUPPORT

THE UN SUSTAINABLE DEVELOPMENT GOALS

How do well-managed forests support the UN SUSTAINABLE DEVELOPMENT GOALS?

Forests mitigate climate change, protect biodiversity and purify the water we drink.

The UN Sustainable Development Goals are a universal call to action that includes quality education, clean water and sanitation, responsible consumption and production, climate action and partnerships that sustain life on land. SFI is committed to doing its part, in the spirit of partnership, to make sustainable choices that benefit future forests — because forests affect us all.

“Healthy forests have a central role to play in achieving many of the 17 Sustainable Development Goals. For instance, it is difficult to imagine how we could ensure water security, achieve sustainable consumption and production or tackle climate change without placing forests at the heart of our sustainable development strategies. This is why we look forward to SFI’s meaningful contribution to the SDGs.”

— Inger Andersen
DIRECTOR GENERAL, INTERNATIONAL UNION FOR CONSERVATION OF NATURE

How do we put
home ownership
within reach for
EVERY FAMILY?

By partnering with Habitat for Humanity to support affordable housing.

SFI and Habitat for Humanity Canada have a memorandum of mutual support to encourage affordable housing. As part of this agreement, SFI funding and volunteers support collaborative solutions including Habitat Canada’s Indigenous Housing Program. This partnership also goes beyond just helping individual families — the wider community benefits from the addition of affordable housing.

“We are excited to keep building on our partnership with SFI. The SFI Women in Wood Build Days, along with our work focusing on youth and Indigenous people, are showing how we can sustain our community by linking our work to well-managed forests.”

OPERATIONS?

SFI training produces professionals committed to sustainability.

SFI Forest Management and Fiber Sourcing certification requires wood-producer training programs to enhance professional development. The training is for employees and the thousands of independent contractors that are key to the quality of forest harvesting operations. Protecting the environment during timber harvesting operations, with an emphasis on best management practices for protecting water resources, is a special focus.

**More than 190,000
training sessions
for resource
and harvesting
professionals
since 1995**

COUNTRIES

How do we help
make supply chains
SUSTAINABLE?

Sustainable supply chains start with certification.

Forest certification standards enhance how brands are perceived because third-party certification shows a willingness to go beyond existing regulations to address global issues like illegal logging and deforestation. International regulations are also driving increased market interest in forest certification as the simplest and most credible tool for demonstrating legality and minimizing risk in the supply chain.

Being endorsed by the
Programme for the
Endorsement of Forest
Certification reinforces
SFI’s position as an
internationally
respected program

Who guides PLT’s EDUCATIONAL PROGRAMS?

The Project Learning Tree (PLT) Education Operating Committee.

The PLT Education Operating Committee is a committee of the SFI Board. It is responsible for providing leadership, direction and strategy development for PLT. This diverse committee works with educators, resource management professionals, youth leaders, citizen conservationists and others.

PLT works to further understanding about natural resource management and complex environmental issues among youth and their families.

THE ERP IS MADE UP EXTERNAL EXPERTS REPRESENTING CONSERVATION, ENVIRONMENTAL, FORESTRY, ACADEMIC, PUBLIC AND GOVERNMENT ORGANIZATIONS

The External Review Panel has reviewed the data in this report, and believes it to be objective, meaningful and credible.

We are pleased to see SFI’s significant progress in surpassing more than 300 million acres/120 million hectares certified to the SFI Forest Management Standard, increasing leadership in conservation research, collaboration and education, and initiating a small forest ownership certification program. These are indications of a healthy, vibrant organization that is enhancing public recognition and acceptance of forest management and responsible sourcing and having real impact on our forests.

Over the past decade, SFI has become a leading sustainability organization that does more than maintain forest certification standards. The addition of the award winning environmental education program, Project Learning Tree and PLT Canada, enhances the overall mission of SFI, adding both an educational and inspirational component to sustainable forest management goals. The future of our forests lies with this next generation and their education on the topic is critical.

Collaboration with other conservation, indigenous and community organizations has become a strength for SFI, which is now engaged with hundreds of social and conservation groups. We believe this leadership is necessary to make wide-spread on-the-ground impacts that are needed for forest conservation. Continual improvement with the State Implementation Committees (SICs) and the conservation impact grants are just two examples of SFI’s commitment to its partners and members.

We recognize SFI’s continuing innovative approaches including the release of the new modules for certification of small ownerships in the U.S. and Canada. We encourage SFI to continue to build partnerships and collaborate with other organizations to grow and expand the implementation of these modules.

SFI staff should continue to work with major brand owners to help them understand the diverse values that responsible forest management provides while continuing to work with underserved communities in both the U.S. and Canada.

Lena L. Tucker

CHAIR OF THE EXTERNAL REVIEW PANEL
PRIVATE FORESTS DIVISION CHIEF
OREGON DEPARTMENT OF FORESTRY

Who reviews OUR DATA?

The External Review Panel.

The SFI External Review Panel is a distinguished group of independent experts representing U.S. and Canadian conservation, professional, academic and public organizations. The panel provides external input and operates independently from SFI.

The panel oversees the SFI standards review process and conducts an annual independent review of the SFI Program to ensure the annual SFI progress report objectively and credibly states the status of SFI Program implementation.

SFI FUNDING

SFI is primarily supported financially by fees from SFI Program Participants who use the program's forest management and fiber sourcing standards. These SFI Program Participants include private landowners, forest product companies, managers of public lands, Indigenous groups, conservation organizations, state and local public agencies, community interests and universities.

In 2017, SFI Program Participants provided **43%** of the funding for SFI and the remaining **57%** came from contributions, federal grants, annual conference revenue, service agreements and other sources.

SFI funding is not tied to the certification decision. Certified SFI Program Participants are audited by independent certification bodies accredited by the American National Standards Institute (ANSI), ANAB and/or the Standards Council of Canada (SCC). SFI has no role in determining whether a certificate is granted — this decision is made independently by the certification bodies.

I am proud to help SFI and my fellow board members continue to look for new and innovative ways to support SFI's three pillars — supply chain assurance, conservation leadership and education and community engagement. In 2018 and 2019, SFI is undertaking a strategic direction exercise to help us think through our role when it comes to the next chapter for our forests, supply chains, communities, conservation efforts and youth environmental education.

Mark Rodgers

CHAIR OF THE SFI BOARD OF DIRECTORS
PRESIDENT AND CEO, HABITAT FOR HUMANITY CANADA

SOCIAL

ECONOMIC

ENVIRONMENTAL

SFI BOARD

SFI® Inc. is governed by the 18-member SFI Board, which sets SFI's strategic direction and is responsible for overseeing and improving the internationally recognized SFI Program and SFI standards. The Board's three chambers represent environmental, social and economic sectors equally.

SFI Board members include executive-level representatives of conservation organizations, academic institutions, Indigenous groups, family forest owners, public officials, labor and the forest products industry. This diversity reflects the variety of interests in the forestry community.

SOCIAL SECTOR

Board members representing the social sector, which includes community or social interest groups such as universities, labor, family forest owners or government agencies:

Mark Rodgers, Ph.D., CEC, RODP (SFI Chair)
President and CEO,
Habitat for Humanity Canada

Dr. Skeet (A.G.) Burris
Family forest landowner,
Cypress Bay Plantation

Laura Downey
Executive Director, Kansas Association for
Conservation and Environmental Education
(KACEE)

Lennard Joe
President,
Nicola Tribal Association

Bob Matters
Chair, United Steelworkers Union of Canada
Wood Council

Bettina Ring
Secretary of Agriculture and Forestry,
State of Virginia

ECONOMIC SECTOR

Board members representing the economic sector, which includes the forest, paper and wood products industry or other for-profit forest ownership or management entities.

Guy Gleysteen (SFI Vice-Chair)
Chairman,
GreenBlue

Craig Armstrong (SFI Secretary-Treasurer)
President and CEO,
Millar Western Forest Products Ltd.

Daniel P. Christensen
Director, Hancock Natural
Resources Group Board of Directors

Michael P. Doss
President and CEO,
Graphic Packaging Holding Company

Jim Irving
Co-CEO,
J.D. Irving, Limited

Jaime Yraguen
President,
Associated Oregon Loggers

ENVIRONMENTAL SECTOR

Board members representing the environmental sector, which includes non-profit environmental or conservation organizations.

Robert Abernethy
President,
Longleaf Alliance

Karla Guyn, Ph.D.
CEO,
Ducks Unlimited Canada

Jonathan (Jon) Haufler, Ph.D.
Past President, The Wildlife Society and
Head of the Ecosystem Management Research
Institute

Mike Parr
President,
American Bird Conservancy

Gail Wallin
Co-Chair, Canadian Council on Invasive Species
Executive Director, Invasive Species Council of
British Columbia
