Forest Trackt™

Note to Healy: I need this slide to set background for data flow
1 minute

ResourceWise Developed A Solution To Simplify The Process With One Simple Geolocation Point

Commercial Ops – Oct 2025
330 mill sites
166,000 polygons
US, Canada, SE Asia and Brazil

ResourceWise®

Sustainability Needs an Easy Button

- Harvest polygon creation without labor input
- Supports any number map risk layers and any risk management schemes
- ResourceWise maps the supply chain with pre-existing data
- Visual proof of chain of custody
- API into other common platforms – SFI and SBP
- Auditable – feature that recursively builds polygons and ESG credentials by shipment

A retailer can know where the trees came from that make up its packaging buy

An auditor can visualize the wood supply chain from an EU Traces number

Measure and visualize the carbon extraction and usage down to the tract level
